REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Regarding claims 1-7, the closest prior art of record, MacDonald et al (US-2002/0187010-A1), discloses a retaining wall block 1 and a retaining wall 90, 190. MacDonald discloses neck portions 14,15 defining a core 13 between head and rear portions of the block, wherein the head and rear portions are defined by front and rear surfaces of the block. Two cavities 18,19 define first and second web portion between cavities 18,19 and side surfaces 24,25. In the embodiment illustrated on Figs. 7, 8 and 13, MacDonald discloses connector plates 80 with channels 70,72 therein to accommodate upwardly extending pins 50 and rods 85. The connector plates are located in recesses of the blocks. The pins engage blocks of a lower course of blocks to blocks of an upper course (see page 3, paragraph [0046]).

However, MacDonald et al fail to disclose a plurality of channel shaped connectors each having first and second side segments wherein the segments straddle a web portion of a wall block in combination with the rest of the limitations provided in the applicant's independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
